PRODUCT DESCRIPTION:

Calcium and magnesium are very important secondary nutrients and part of the chlorophyll molecule which is necessary for sugar formation. Inadequate amounts of magnesium will first appear as a general loss of green color at bottoms of older leaves (interveinal chlorosis). Continued deficiency will also affect

younger leaves, followed by formation of lesions. Calcium and magnesium deficiencies occur mostly in soils with a high pH (over 8) and acidic soils with a pH less than 6.5. High levels of calcium and potassium will also reduce mag-

AGRICULTURAL APPLICATIONS

Cal Mag Max is a Growth Products' fertilizer designed specifically to satisfy the special needs of plugs and other plants grown in soilless media. This product breaks the barriers between fertilizers and micronutrients, giving you the best of both. Cal Mag Max contains the perfect 2 to 1 ratio of calcium to magnesium. The calcium and magnesium are 100% chelated with a special sugar-acid chelate. Cal Mag Max works faster and is less wasteful
