

Important Safety Information
Read and understand all safety precautions and instructions before use.

The Clump Grubber HD is designed for outdoor use. Check the Clump Grubber HD before each and every use for signs of wear. Do Not use if damaged or not working properly. The Clump Grubber HD is designed for use on shallow rooted trees and brush. Functionality can vary by root system/tree type, soil type, and ground condition. The Clump Grubber HD is not to be used on people or pets.
For use with ATV & UTV

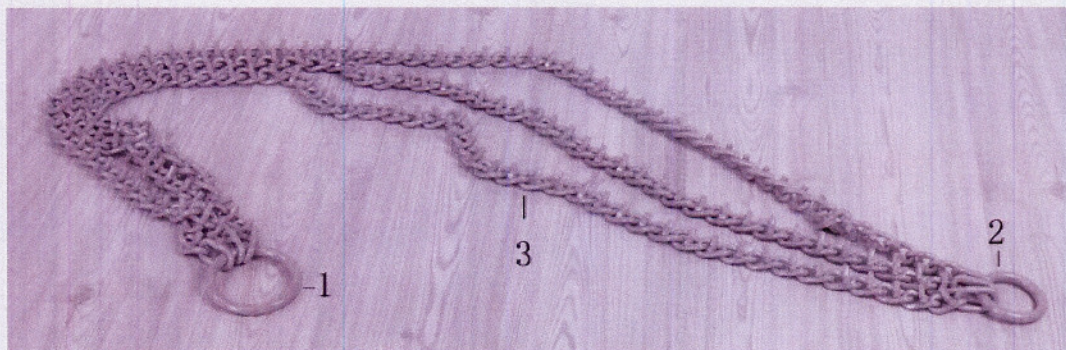

INSTRUCTIONS

1. Wrap the Clump Grubber HD around the shrub or clump of trees to be extracted with the No Slip Grip Teeth on the chains facing towards the shrub or clump being extracted.
2. Place the small loop (BG19-02) through the big loop (BG19-01). Cinch the chain through the loop 180 degrees from where you are pulling. This will allow the ring to tighten over the links as far as possible for the best grip.
3. Hook the Grubber Tugger Chain Xtreme (Model BG-12) to the small loop (BG19-02) and attach the other end of the chain to your ATV or UTV.
4. Slowly drive forward extracting the shrub or clump. **DO NOT JERK CHAIN.**
5. Remove the Clump Grubber HD by backing up to put some slack in the chain. Detach the chain from the Clump Grubber HD.
6. Pull the small loop (BG19-02) back through the large loop (BG19-01).

Product is warranted against manufacturer defects. BAC Industries, Inc will not accept any returns without prior authorization.

PARTS DESCRIPTION

Ref. #	Qty	Part #	Description
1	1	BG19-01	Big loop 3-1/2" I.D.
