

Directions for Use:
Apply Polar Thaw
Ice Melt at a rate of
6oz. per square yard
of surface.

Excerpt from the HITEC
Technical Evaluation
Report (CERF#40410)

4.2 Effects on
Infrastructure:
Corrodes at only a
fraction of the rate
observed for ordinary
road salt. Indeed, in
some cases, the
product displayed an
absolute corrosion
inhibiting property
causing even less
corrosion than
pure water.

Ingredients: Magnesium
Chloride MGCL₂, Sodium
Chloride NACL,
Agriculturally derived
inhibitor patent
#5,635,101 & 5,965,058

Polar Thaw Coated Granular Ice Melt

Made in the USA

- Increases Working Temperature of Salt by 100%
- Spreads more Evenly with Less Bounce and Scatter
- Melts Snow and Ice faster and at Lower Temperatures than Salts
- Less Harmful Runoff
- Effective Down to -20F
- Inhibits Salt's Messy Residue
- Safe for Grass, Plants and Pets
- Less Dangerous to Concrete & Steel
- Keeps Melted Ice in a liquid state longer
