

# Bare Ground Solution™

## Calcium Chloride Liquid

# Bare Ground Bolt

Made in USA

Making your home and grounds safer and easier to manage.

Get out ahead of the storm with the only preventative solution to ice & snow

Can Melt to -67°F Below Zero

- Melts on Contact
  - Professional Strength
  - Leaves No White Residue
  - Safe on ALL Surfaces
  - Create Active Melting Barrier
  - Enviro Safe and Biodegradable
  - Melts 7X Faster than Rock Salt
  - Keeps Dust Down by Absorbing Moisture
  - Exo-Thermic (Heat Generating) Ice Melter
  - Keeps Dust "Down" on Unpaved Roads
  - Prevents Bonding to Surface of Ice and Snow
- 5 Gallon / 18.93 Liter

Apply by using any sprayer that can deliver a mist or stream. Apply full strength to driveways, walkways, steps, porches, roof and eaves. For trees and shrubs mix with 50% water. Plan your application from the farthest point to minimize walking through the solution. Water soluble. Will not stain and washes off easily. One gallon covers approx. 1000sq.ft. Equal to 50lbs. of rock salt. Can reduce snow accumulation if applied no more than 1 1/2-2 hrs. before the start of a storm between temperatures of 25-32 degrees by liberally misting the entire surface with Bare Ground Solution.

*As a De-Icing Solution:* Apply in a stream (not a mist) to packed snow and ice. Allow between 60-90 minutes for maximum melting before shoveling.

*For Thick Ice Application:* Use Bare Ground in conjunction with salt and sand to speed the process or use Bare Ground Coated Salt.

The Professionals choice for winter road maintenance. Federally subsidized for State use under the 1998 Transportation Equity Act Section 23 Sub Section 1806. Used by State transportation departments in: Colorado, New York State, Michigan, Washington & Wisconsin.
