ROOTBLAST® is a professional formula that helps plants develop root growth in both new and established plants. The bigger roots absorb more water and nutrients for an overall vigorous, bigger plant!

**DIRECTIONS for using ROOTBLAST** (1 scoop = 1 teaspoon)

**Transplants/Bedding Plants:** Sprinkle 1-scoop of ROOTBLAST into hole, position plant, and gently fill soil around roots. Gently pack soil and water thoroughly.

**Plants in Ground or Container:** Sprinkle 1 to 2 scoops of ROOTBLAST evenly over soil surface, below branches, away from base of plant. Lightly work into soil.

**Seeds Indoors & Outdoors:** Sprinkle ½ scoop of ROOTBLAST into each seed hole or 1 scoop per 12 inches of soil. Position seeds and cover with soil according to directions on seed packet.

**House Plants:** Sprinkle ½ scoop of ROOTBLAST for every 4 inches of container size. Gently work into soil and water.

**Outdoor Containers:** Mix 1 scoop of ROOTBLAST with soil when planting in a 4 to 6 inch container. For larger containers add another scoop for every additional 2 to 4 inches of container.

**Apply ROOTBLAST once per season.** Wait two weeks before applying additional fertilizer.

**GUARANTEED ANALYSIS:**
- Total Nitrogen (N) 2.00%
- Available Phosphorus (P₂O₅) 1.00%
- Soluble Potash (K₂O) 2.00%
- Calcium (Ca) 13.8%
- Magnesium (Mg) 7.5%
- 0.97% Water Soluble Magnesium (Mg)
- 0.01% Water Soluble Iron (Fe)

**Derived From:** Calcium Nitrate, Super Phosphate, Sulphate of Potash Magnesia, Dolomitic Limestone, Farmstead Sulphate, Iron Oxide, Copper Oxide, Calcium Borate, Manganese Oxide, Zinc Oxide.

**Maximum Broadcast Application Rate:** 436 pounds per Acre 3 times per year. Maximum Rate for Potted Plants: One teaspoon per 6 inch pot 3 times per year. F1233
