FULLY ADJUSTABLE!
No drums to buy.

ACCURATE!
Consistent volume measurements of dry, free flowing fertilizer or other materials.

FAST!
Delivers up to 2,275 applications per hour.

SAVES!
Labor costs and back strain.

DURABLE!

Designed for FAST ACCURATE APPLICATION of any free flowing dry material, the E-Z FEEDERS are used by nurseries, greenhouses, landscapers and others for applying fertilizers, systemic, herbicides, and other dry materials. The E-Z FEEDER IS SIMPLE TO OPERATE: just set for the desired amount, place the tube near the surface of the container and depress the plunger. The material is then deposited in the container. The tube will easily fit through thick foliage keeping the material off the plant.

**E-Z FEEDER MODELS A, A-1, & M.M.:** Great for dispensing granulars. These FULLY ADJUSTABLE units operate by pushing down on the plunger, which is returned to load by a spring. The hopper has a capacity of 500 tps. Good for bench applications by simply removing the extension tube. Shipping weight is 3.5 lbs.

| MODEL M.M. | MARATHON®, RONSTAR®, ETC.  
( not recommended for fertilizer) | 1/12 thru 1 tsp., (0.4 thru 5 grams) |
| MODEL A-1 | MARATHON®, RONSTAR®, ETC.                             | 1/8 thru 1 1/2 tps., (0.75 thru 7 grams) |
| MODEL A  | FERTILIZERS & OTHER GRANULARS                        | 1/2 thru 4 tps., (2.5 thru 21 grams) |

**E-Z FEEDER MODELS C, C-1, & C-2:** Great for dispensing time-release fertilizers into containers sitting on the ground. These FULLY ADJUSTABLE units operate with a push/pull plunger. With a 50% larger hopper capacity, they can hold 750 tps. Because of their size, they come with an adjustable neck strap and are not recommended for bench applications.

Shipping weight 4.2 lbs.
