

### Assembly Instructions

To attach saw blade to pruning head, remove saw blade screw "A". Slip keyhole in blade over slotted head of pivot bolt "B". Slide saw blade into position with narrow portion of keyhole aligned with pivot bolt. Position either of the small holes on the saw blade over the saw blade screw hole, replace saw blade screw and tighten securely.

NOTE: The angle of the saw blade can be changed by choosing between the two holes in the bottom of the saw blade.

### Care and Storage

This Corona tree trimming tool is designed to give you many years of service. After each use, inspect the tool and clean off any dirt or sap that has collected. Lightly oil pivot bolt, cutter blade and saw blade to help prevent rust. Store with saw blade detached. Keep out of reach of children.
