## 48T Lawn Roller

### OPERATION

Though most rollers are filled with water, we recommend adding Ethylene Glycol Anti-Freeze with the water. This will protect the tank from damage during cold weather. It is also recommended that the anti-freeze used, contain a rust inhibitor to protect the inside of the tank against rust. If the roller is filled with water only, it must be drained whenever the temperature drops below 32 degrees F. (0 degrees C.). The roller weighs approximately 850 pounds when filled.

### ASSEMBLY INSTRUCTIONS

1. Slide side bars (6) over axle with the flanges of the bearing towards the inside of the roller head, add washer (5) and lock in place by inserting and spreading ends of the cotter pins.
2. Add hitch tube (12) to side bars using 3/8" bolts (7) and 3/8" nuts (8).
3. Add clevis bars (13) to hitch tube with 3/8" bolts (7) and 3/8" nuts (8).

### REPLACEMENT PARTS

PART NO.	REF. NO.	AMT.	DESCRIPTION	PART NO.	REF. NO.	AMT.	DESCRIPTION
