

# YARD ENFORCER<sup>®</sup>

MOTION ACTIVATED PEST DETERRENT SPRINKLER

## DON'T HURT 'EM, JUST SQUIRT 'EM!

This innovative sprinkler provides motion activated watering to protect landscapes and gardens from animals and pests. A powerful combination of spray, motion and noise not only acts as a deterrent, but actually conditions animals and pests to stay away from the enforced area. The motion sensor is easily adjusted for sensitivity and range. The Yard Enforcer<sup>®</sup> uses the minimum amount of water necessary – in most cases just 2 cups per activation – to deter intruders, and is the only motion activated sprinkler that uses intelligent sensing to save water and power by distinguishing between trees and animals.

## FEATURES & BENEFITS

- Infrared motion sensor is easy to adjust and use
- 120° sensor range
- Adjustable 3-5 second water burst
- Adjustable range detection up to 40 ft.
- 3 Time of day settings: morning only, evening only or always on
- Adaptive programming
- Provides a 30 minute watering cycle
- 35 ft. radius impact sprinkler
- Sprinkler arc can be adjusted 0° to 360°
- Precision aiming with the ability to move the sensor to face up, down, left, or right
- Use on its own or attach multiple sprinklers with dual outlets after valve
- All-metal dual-step spike with brass swivel to attach multiple enforcers
- 25 PSI pressure regulator extends life of garden hose
- Uses 4 AA batteries (not included)
