Coir “lay flat” grow bags are widely used in greenhouse vegetable production. Fibredust’s four proprietary blends have the versatility to provide the right growing conditions for any greenhouse technology, and any crop.

## Sizes:

100 x 15 x 10cm  
100 x 20 x 10cm

**3** Levels EC  
Standard .8  
Low .5  
Buffered .2

**pH** 5.5 to 6.5

### Consistant Moisture Holding

### TRUE

Our proprietary tried and “true” blend, designed for moisture retention. True Grow bags posses a forgiving nature, retaining more than a days supply of moisture while at the same time, never over saturated. Moisture retentive with great drainage is the perfect combo for many cultivation methods and crops

### Aggresive Draining, Retention

### ACTION

Action grow bags deliver results in greenhouse where the grower needs a more aggresive irrigation fertigation schedule. Coir pith provides moisture and root contact while coir chips foster drainage and circulation through the rootzone.

### Multi Irrigation Cycles Welcome

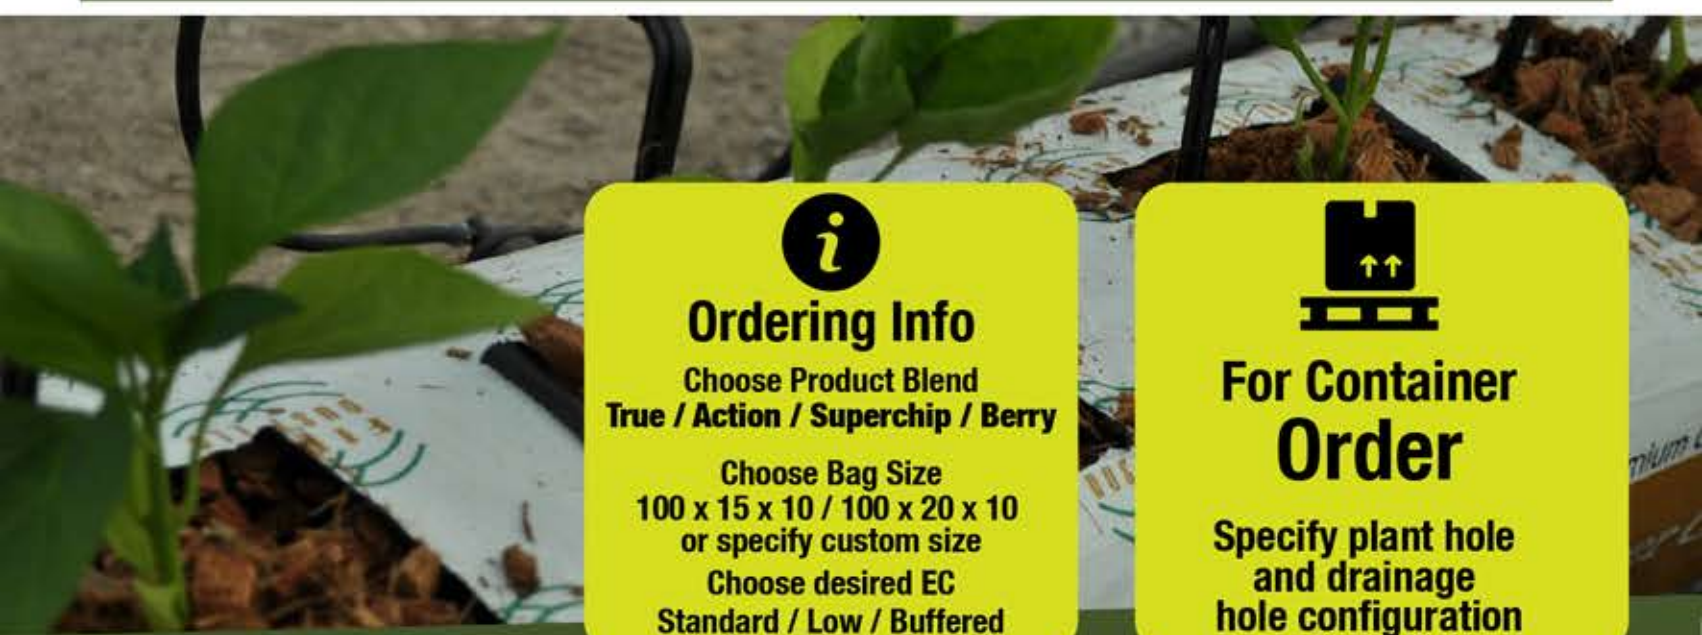

### SUPERCHIP

If your growing method involves multiple irrigation cycles per day, super chip is the coco coir grow bag you want in your greenhouse. Extreme flow through with no oversaturation is the feature of these growbags. Intense fertlizer schedules reward growers with massive root formations, healthy productive plants

### Strawberry Special Blend

### BERRY BLEND

Strawberry substrate needs are all met with our heavy pith blend that delivers the moisture berries need without being soggy. Blend your Nutrients and set up fertigation schedules knowing your strawberry root system is embraced by just the right texture to thrive.

#### Ordering Info

Choose Product Blend  
**True / Action / Superchip / Berry**

Choose Bag Size  
100 x 15 x 10 / 100 x 20 x 10  
or specify custom size

Choose desired EC  
Standard / Low / Buffered

#### For Container Order

Specify plant hole and drainage hole configuration

#### Load Specifications

Containers load and pallet load size vary with bag size  
100 x 15 x 10 / 10,000 per 40 HC  
100 x 20 x 10 / 9,000 per 40 HC  
Custom Sizes:  
Quantity provided per quote

#### Installation

The versatile nature of our lay flat grow bags allows installation on the ground, suspended in gutters or troughs, or elevated table tops. The critical aspect of installation is the need to provide proper slope for irrigation and runoff collection. Slope can be provided by earth grade, floor grade, or suspension levels and should be a minimum of 1.5%.

#### About Fiberdust

FibreDust is a leading producer of coco coir products with worldwide market penetration in agriculture, horticulture and soil blending. Our product lines include coir block, coir brick, coir disc, grow bags, twine, erosion control and more. Production located in company owned factories in India and Sri Lanka.
