

# NASH Heavy Duty Pruner

Meet NASH!

## Bigger Cuts

The blade has a cutting capacity of 1.0 inches. Blades are replaceable.

Largest cutting capacity

## High Carbon Steel Blade

Specially heat treated to keep the edge an extra long time. Blade is replaceable.

## Branch Hook

Specially Designed branch hook is designed to remove cut branches. The hook is separated from blade for maximum strength and efficiency.

## Pipe

The pipe is made with ultra lightweight aluminum alloy for strength while still being lightweight and maneuverable.

## Sliding Support Grip

Gives you more control of the pruner, especially at the longer lengths! The grip is adjustable. Just turn the white dial nut to slide to the spot most comfortable for you and retighten.

## Improved Durability

Internal construction is far more rugged.

## Handle

The handle rotates 90° so you can get the perfect angle for the cut. Move the blade- not your hand!

AML Item# NS20
