

PRIME SOURCE

HALO 5WDG SELECT™

Selective post-emergent herbicide

ACTIVE INGREDIENT

Halosulfuron-methyl

% ACTIVE INGREDIENT

Halosulfuron-methyl . . .5%

FORMULATION

Water dispersible granule

CHEMICAL FAMILY

Sulfonylurea;
Group 2 herbicide

BRAND ALTERNATIVE

Sedgehammer® 13.5g

SIGNAL WORD

Caution

PACKAGING

12 x 13.5 gr

LABELED USES

Residential and
commercial turfgrass

Established woody
ornamentals in
landscape areas

Golf course turf

Sports turf

Public recreation areas

School grounds

Roadsides

Sod farms and non-crop
industrial sites

IMPORTANT:

ALWAYS READ
AND FOLLOW LABEL
INSTRUCTIONS.

Halo 5WDG Select™ is a selective herbicide for post-emergence control of sedges such as purple and yellow nutsedge, *Kyllinga* species and certain broadleaf weeds (see weeds-controlled chart). Halo 5WDG Select can be applied to commercial and residential turfgrass and on other non-crop sites including: airports, campgrounds, cemeteries, established woody ornamentals in landscape areas, fairgrounds, fallow areas, fuel storage areas, golf courses, landscaped areas, lumberyards, public recreation areas, race tracks, residential property, rights-of-ways, roadsides, school grounds, sports fields, tank farms and tennis courts.

Halo 5WDG Select should be applied as a post-emergent to turf and landscape ornamental areas where weeds are an issue and actively growing. This product is generally regarded as gentle to labeled turfgrasses, both cool and warm season types and they should be well established before application occurs. Halo 5WDG is not for use on edible plants or gardens.

- Post-emergent control of yellow and purple nutsedge
- Suppresses annual and green *kyllinga*
- Controls tough broadleaf weeds such as horsetail and ragweed
- Low use rates – 1 (13.5 gr) or 2 (27 g) pouches in 1 to 2 gallons of water to treat 1,000 sq. ft.
- Can be tank mixed with non-ionic surfactants for improved penetration

HALO 5WDG SELECT™

Selective post-emergent herbicide

Use Information for Halo 5WDG Select™

TURFGRASSES

When applied as directed under the conditions detailed in the label, the following established turfgrasses are tolerant to this product:

Cool-Season Grasses

Bentgrass, creeping; Fescue, fine; Ryegrass, perennial; Bluegrass, Kentucky; Fescue, tall

Warm-Season Grasses

Bahiagrass; Seashore paspalum; Kikuyugrass; Bermudagrass; St. Augustinegrass; Centipedegrass; Zoysiagrass; Buffalograss

ESTABLISHED WOODY ORNAMENTALS IN LANDSCAPED AREAS

This product may be applied at specific rates as a post-directed spray around any established woody ornamental species in landscaped areas. For transplanted woody ornamentals, allow three months after transplanting before applying this product.

NOTE: Avoid contact of this product to leaves of desirable plants since foliar injury, discoloration or death may result.

FALLOW TREATMENTS

This product may be used on fallow areas prior to the establishment of turfgrass or woody ornamental plants. Allow 4 weeks between application and seeding or sodding of turfgrass, or transplanting woody ornamentals.

USE PRECAUTIONS

For optimum results, do not mow turf for 2 days before or 2 days after application. This product is effective if no rainfall occurs within 3 hours, but best results are obtained with no rainfall or irrigation for at least 4 hours. This product may be used on seeded, sodded, or sprigged turfgrass that is well established. Allow the turf to develop a good root system and uniform stand before application. Treated areas may be overseeded with annual or perennial ryegrass or bermudagrass, 2 weeks after application.

Color plants or herbaceous ornamentals may be injured when transplanted into landscaped areas treated with Halo 5WDG Select. Avoid application of Halo 5WDG Select when turfgrass or nutsedge is under stress since turf injury and poor nutsedge control may result.

- Do not apply as an over-the-top spray to desirable flowers, ornamentals, vegetables, shrubs or trees.
- Do not apply this product to golf course putting greens.
- Do not apply this product through any type of irrigation system.
- Do not apply this product by air.

Post Emergent Weeds Controlled Include:

Purple nutsedge	Giant ragweed
Yellow nutsedge	Horsetail
Cocklebur	Pigweed
Common sunflower	Velvet leaf
Common ragweed	

Post Emergent Weeds Supressed:

Kyllinga, spp.
