- Puts faucet & hose storage in most convenient location
- Saves landscaping from dragged hose
- Heavy duty bracing prevents sagging
- All brass fittings

Installations instructions:

1. Dig a hole. Center the hose hanger in hole at least 8" deep
2. Add quick setting concrete. Allow to harden according to instructions
3. Optionally, the hose hanger easy slides over a fencing "T" post
4. Attach water supply hose bib, the faucet can also be plumbed directly to in-around PVC or copper systems
