

Plantskydd— Swedish for 'Plant Protection'

Longest Lasting, Year Round Protection!

Testimonials

Simply the best repellent—I've tried them all !

—Karen Park Jennings, owner, **Park Seed Company**, Greenwood, South Carolina

This all-natural, 100% environmentally safe spray is **simply the best I've ever found**—and I've tried them all. You will love spraying once every few months instead of after every rainfall. **This makes Plantskydd far more economical than most animal repellents.** The real advantage is simple—*Plantskydd* works!

We've had hundreds of accounts tell us nothing works as well, or as long !

—Joel Klessens, Wholesale Division, **Alaska Garden & Pet**

I can't keep it on the shelves fast enough. Everybody loves it !

—Sharon Parker, **S&W Conservation District**, Jackson County, Michigan

We have tried all the other deer repellents....

—Lee Padgett, **Landscape Manager**, Reynolds Plantation Owners Association, Lake Oconee (Atlanta), Georgia

Reynolds Plantation is a **7,000 acre, upscale resort** and residential community, with a very large deer population. We were initially rather skeptical to try *Plantskydd* because we have tried all the other deer repellent products and did not see very good long-term results. We were impressed!

Plantskydd is mainly used for our annual color plantings (pansies and violas in the winter season, and begonias, petunias, impatiens, salvias, etc. in the summer season) and **we have had remarkable results.** We have since used it on all types of landscape plantings, and have found the same results.

Several of the property owners using *Plantskydd* have since **dismantled their electric deer fences** surrounding their property; creating a more pleasing outside appearance for their home. We have a steady stream of visitors who are amazed as they ride throughout the property and see deer everywhere, yet note very little damage to our landscape plantings. Thank you again for such an effective product!

Testimonials

I haven't had any VOLE damage !

—Cheryl Martin, Franktown, Colorado

I haven't had any vole damage since spraying with *Plantskydd*. I am thrilled! My flowers are more beautiful than they have been in decades. **No deer damage, no bunny damage, no vole damage!**

You don't have to re-spray after each rain...

—Marlene Johnston, Orofino, Idaho

Last August I replanted my entire iris garden—350 varieties. Four years ago, deer came and pulled up over 70 newly planted varieties. Although I saw some evidence of deer before applying *Plantskydd*, **there was no further evidence of deer** visiting my iris garden. None at all.

I was also finally able to enjoy my roses. What a bonus!

While *Plantskydd* seems expensive at the outset, one advantage I really like is that **you don't have to re-spray after each rain.** I've recommended it to many people—a product that really works!

Rabbits hate Plantskydd !

—Kim Green, Simi Valley, California

I applied *Plantskydd* in early spring to all the perennials and spring flowering bulbs the rabbits usually chomp to the ground. **For the first time ever—not a nibble!**

Plantskydd is better than fencing !

—Steve Sandeen, **Head Gardener**, College of the Redwoods, California

In the 13 years that I have worked for the College, I have tried many commercially available repellents for browsing deer, but none of them worked for very long. Then **our local Agriculture Commissioner told me to try Plantskydd**—so safe it isn't regulated by the EPA!

Wow, what results! The deer stayed completely away from treated plants. **Even after weeks of rain, deer did not return** for over a month. We are starting to replant species we had given up on as being impossible to grow in our deer infested environment. **I think Plantskydd is better than fencing!**

Why is Plantskydd Repellent the #1 choice of Professional Growers?

- **PROVEN** by independent research to out-last and out-perform all other repellents—up to 6 months over-winter!
- **EFFECTIVE** against: deer, rabbits, voles, elk, moose, chipmunks, squirrels, nutria, opossum, and mountain beaver.
- **RAIN-RESISTANT**—no need to re-apply after every rainfall.
- **SAFE** for use in vegetable gardens, on fruit trees and food crops.
- **ORGANIC**—first animal repellent OMRI Listed by the Organic Materials Review Institute for food production.
- **3 FORMULATIONS** for maximum effectiveness and user convenience.
- **BONUS**—built in fertilizer results in bigger, healthier plants!

Moose

Frequently Asked Questions

Is Plantskydd safe to use?

Yes! **Made in the U.S.A.** Pronounced: *plant-skidd*, it contains no synthetic additives, is non-toxic, and is not harmful to animals or the environment. *Plantskydd* is Swedish for 'plant-protection,' where it was first developed to protect its vast tree plantations from browsing by deer, rabbits and moose—while also adhering to its strict environmental laws. It is equally effective protecting ornamentals, shrubs, and food crops.

Can I use Plantskydd on my vegetable garden?

Yes! **Plantskydd is safe** for use in protecting vegetables, legumes, fruit and other food crops from animal browse damage.

OMRI listed ORGANIC

Plantskydd—the **first animal repellent OMRI Listed** by the Organic Materials Review Institute as *suitable for use in the production of organic food* and is USDA approved for organic gardening.

BONUS! – Fertilizing Effect

Plantskydd's active ingredient has long been recognized as an organic fertilizer.

"All plants tested that were treated with Plantskydd were larger, had more flowers and generally had greener leaves. This response is typical of the response created by an increased level of fertilization."

—E. Jay Holcomb, Professor of Floriculture, Penn State University

Plantskydd is a Proven Leader!

- #1 Most Tested
- #1 Most Effective
- #1 Longest Lasting

100% Organic—OMRI listed
Rainfast in 24 hours
Acts as a fertilizer

How is Plantskydd different from other repellents?

Unlike other repellents that quickly lose their effectiveness after irrigating or rainfall, *Plantskydd* is rain and snow resistant. It does not require immediate re-application and is now the #1 animal repellent choice of professional growers, foresters, and landscapers.

Why does Plantskydd work so well?

Plantskydd repels by emitting an odor browsing animals associate with predator activity—stimulating a fear-based response that will have garden feeders looking for somewhere else to dine.

Research* has proven odor based repellents are more effective than other repellent systems. Animals avoid plants before they bite—not after!

* *Studies investigating trends in efficacy of deer repellents indicate that, of the 20 products tested, repellents with active ingredients that emitted sulfurous odors i.e., bloodmeal or egg solids, generally provided the best results.*

—Nolte & Wagner, USDA / APHIS, National Wildlife Research Center Olympia, WA. (Advances and Challenges in Forest Regeneration - 2000)

Plantskydd is **proven effective** against: deer, rabbits, elk, moose, voles, squirrels, chipmunks, hares, nutria, opossum and other small critters.

- Most Tested • Most Effective • Longest Lasting

View over 50 Field Tests* conducted by researchers, farmers, foresters, growers and professional landscapers in the USA, Canada, and Sweden—www.plantskydd.com

What is Plantskydd?

Made from (porcine or bovine) *dried blood**, vegetable oil, and water. An EPA exempted, minimum risk* pesticide, and is exempt from Federal Insecticide, Fungicide, and Rodenticide Act requirements, specifically under Section 25(b).

The EPA has determined... the use of these pesticides poses insignificant risks to human health or the environment. The agency... is responding to society's increasing demand for more natural and benign methods of pest control.*

What Plantskydd formula is best for me?

For large herbivores—**Deer, Moose and Elk**—use pre-mixed liquid *Plantskydd* or the economical, Soluble-Powder-Concentrate.

For **Rabbits, Voles, Chipmunk, Squirrels, Nutria, Opossum, Mountain beaver**—use Granular *Plantskydd*.

Pre-mixed RTU liquid

- 1 quart / 1 litre spray Bottle—protects over 100 plants, 1 ft high
- 1.3 gallon / 5 litre Jug—protects 500-600 plants, 1 ft high

Soluble-Powder Concentrate (mix your own)

- 1 lb / 454 g—protects over 400 plants 1 ft high
 - 2.2 lb / 1 kg—protects over 900 plants 1 ft high
 - Bulk* 22 lb / 10 kg—protects over 9000 plants 1 ft high
- * Ideal for agriculture, golf courses, and large estate landscapes.

Granular Formulation

—Not Available in CANADA—

- 1 lb—protects approx. 600 sq.ft
 - 3 lb—protects approx. 1,800 sq.ft
 - 7 lb—protects approx. 4,200 sq.ft
 - Bulk* 20 lb—protects approx. 12,000 sq.ft
- * Ideal for agriculture, golf courses, and large estate landscapes.

How can I protect fruit trees?

Whips—if you're planting fruit tree whips, dip them in *Plantskydd* solution before planting, or coat the whips using a paint brush. Then spray trees when leaves have formed.

Mature trees—treat prior to bud-flush, or 2-3 weeks after. Avoid treatment while buds are forming. Treatment over foliage is enough to deter browsing herbivores.

Will Plantskydd hurt my dog?

Some users have reported that the family dog is quite enamored with *Plantskydd* when it is initially sprayed on plants. It will not harm animals, but it's best to leave Fido inside, until treated plants are dry (1-2 hrs).

Pre-mixed Liquid and Mix-your-own Concentrate
Best for: deer, elk, moose.

Granular Formulation
Best for: rabbits, voles, and small critters
(chipmunks, squirrels, nutria, opossum, mountain beaver).

How often do I need to treat my plants and trees?

- For best protection, treat plants before browse begins, in spring or fall.
- **Always treat new growth**—until plant has reached full size or leaf-out.
- *Plantskydd* liquid formulation **lasts up to 6 months over winter** on dormant plants, and **3-4 months during the active growing season**.
- IMPORTANT—**spray liquid** *Plantskydd* on **dry plants**—allow to dry for 24 hours.
- *Plantskydd* is rain-resistant and does not require re-application after watering or rainfall.
- Ideally, spray in the morning or late afternoon, when the sun is not as strong.
- **Granular *Plantskydd* may be applied at anytime.** Re-apply as required. To activate granules, lightly water the area where granules have been applied.

How should I store Plantskydd?

Protect from heat. Store in cool, dry, dark location. Keep from freezing. KEEP OUT OF REACH OF CHILDREN AND PETS.

- **Soluble Powder Concentrate** (mix your own)—lasts 5+ years in its original package. Tightly re-seal unused powder.
- **Ready-to-use Liquid**—use within 3 months of opening the sealed container. *Plantskydd* is a 100% natural, organic product and will start to go off in warm weather. Once mixed into solution, use within a few days. Apply unused solution as a fertilizer.
- **Granular**—lasts 5+ years in its original packaging. Tightly re-seal unused granules.
