

Ivy X Post-Contact Cleanser

USES: Assists in the Removal of poison oak and ivy oil, urushiol, that causes rash and itching. Ivy X Cleanser is most effective when used within the first hour of possible exposure.

DIRECTIONS: Apply Ivy X Cleanser to exposed unwetted skin as soon as possible after possible exposure to poisonous plants. Rub vigorously for 2 minutes to assist in the removal of oils and other contaminants from skin. Rinse skin clean with cool running water or wipe off with a cloth. Repeat. Wash Hands thoroughly to avoid spreading oils to other parts of the body.

WARNINGS: KEEP OUT OF REACH OF CHILDREN.
For external use only. Should not be applied to raw or oozing area of skin. If redness occurs, discontinue use and consult a physician. Keep out of eyes and other mucous membranes.

CAUTION: Do not use this product for at least 3 days after using hydrocortisone preparations on the affected areas.
