

# Topdress with PBH for improved weed control.

## Steps to success.

- ▶ At transplant, allow 2½ to 3 inches of space at top of container to accommodate PBH Nature's Media Amendment
- ▶ Apply 1½ to 2 inches of PBH Nature's Media Amendment
- ▶ Cover entire container surface to inhibit weed seed germination from below and above – soil borne and air borne
- ▶ After topdressing with PBH, apply herbicides and fertilizers according to label instructions and rates
- ▶ Irrigate as normal to help settle PBH in place

Always trial any material used in a new application for adaptability to your operation.

## Benefits.

- ▶ Improves weed control
- ▶ Significantly reduces hand-weeding labor and expense
- ▶ Helps control moss species, such as liverwort
- ▶ Reduces the potential for drought stress and watering
- ▶ Helps reduce phytotoxicity in herbicide-sensitive plant material

## Did you know?

You can also use PBH as a media amendment to improve the porosity, drainage and stability of your mix. Used as a pine bark replacement in quantities of 10 to 40%, PBH provides sustainability and value.
