Essential® Plus

Biostimulant & Soil Amendment

DPH Biologicals™

Product Description

Essential Plus is a biostimulant and soil amendment that feeds beneficial soil microbes which improves soil health and plant growth. Formulated for all types of soils, Essential Plus contains organic building blocks such as proteins and humic acids, components not found in typical N-P-K fertilizers. These components additionally provide food for beneficial microbes which help alleviate soil compaction and replenish soils.

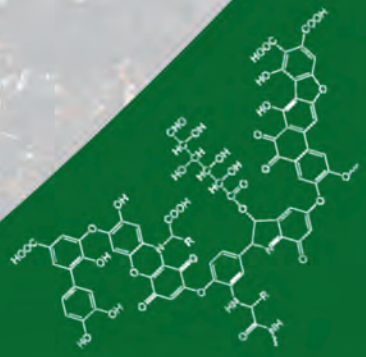
Benefits

- Feeds Beneficial Soil Microbes
- Reduces Stress from Salinity & Heat
- Reinforces Nutrient Absorption
- Develops Carbon Rich Soils

Applications

- Turf
- Landscape
- Tree Care
- Lawn Care
- Nursery
- Greenhouse
- Hydroseeing

Not for Food Crop Use



Humic Acids

Organic compounds that:

- improve cell wall permeability
- increase microbial activity
- reinforce nutrient absorption
- enhance drought tolerance

Customer Results

New York, United States

Product Breakdown

Humic Acids

Rich organic carbon source that enhances microbial activity and soil structure

Seaweed Extract

Provides nutrients to soil for plants supporting root formation

Sugars

Energy source for microbes

Corn & Fish Hydrolysate

Increases soil fertility by providing amino acids & vital nutrients for plants and the soils microbiome

ROOT & SHOOT GROWTH

RELIEVES PLANT STRESS

IMPROVES SOIL HEALTH

STRENGTHENS MICROBIAL POPULATION

ENHANCES NUTRIENT UPTAKE
