

**“Works best with low volumes of water”**

--- Warner Winthrop, Sales Representative of Coleville Nursery, Virginia

**“We have found that the landscape mats provided by Zynnovation have really allowed for better root development and overall tree health in our parks.”**

--- Greg Sager, Director, Hanover County Parks and Recreation, Virginia

**“The product may have its greatest utility where more extensive irrigation and plastic mulch systems are not available or not cost effective.”**

--- Greg Litus, Manager, Manager, Colorado State University, Western Colorado Research Center

**“Very encouraging results!” and “looks much better than those ugly green bags”**

--- Luke McCall, Former Arborist in City of Richmond, Virginia

**“Zynnovation's plant mat product could be well suited for young grapevines during the 2-3 year establishment period of a vineyard when the vines are most sensitive to water stress and more growth is desired to bring vines into production. I was also impressed with the potential for weed suppression they can offer all while providing the environmental benefits of reducing herbicide inputs and conservation of valuable water resources.”**

--- Tom Kelly, President of Virginia Vineyard Association
