

HIGH INTENSITY GRADE SELF ADHESIVE REBOUNDABLE REFLECTIVE CONE COLLARS
Reflective Cone Collars are classified as Type III, Class-1

Part #	Size	
CC 616	6" X 16" Upper Cone Collar	
CC 422	4" X 22" Lower Cone Collar	

HOW TO APPLY SELF ADHESIVE REFLECTIVE COLLARS ON TRAFFIC CONES

- Spray Bottle - Mixture of 95% water with 5% Palmolive or any liquid detergent soap
- Plastic Squeeze -To remove excess water from cone surface
- Plastic Ruler -To measure distance between collars

Instruction

First, Begin by spraying the cone top surface with the wetting solution from spray bottle.

Next, remove the reflective vinyl collar film from the backing paper by peeling it back from one corner. You may also spray the adhesive of the collar.

Next, place the collar on the wet surface of the cone and position it as shown on above picture. Once you are satisfied with the position, begin pressing it down from the corner using the squeegee. This will help remove the excess liquid and air bubbles.

You can use a plastic credit card as a squeeze. Our cone collars fits to any cones.

Next, make sure to clean all the excess liquid from the cone by paper towel.

Please allow few hours for firm bonding.
